PROFESSIONAL SUMMARY

QA Lead and front-end developer with 9+ years across web engineering, quality assurance, accessibility and automation. Currently leads QA for a platform of 250+ school websites, combining WCAG 2.1/2.2 accessibility testing, Core Web Vitals, manual and automated QA, front-end diagnostics and applied AI/LLM engineering. Known for building internal tools and reporting systems that turn manual, multi-week workflows into measurable, scalable processes.

KEY ACHIEVEMENTS

- Lead QA delivery for 250+ live school websites on a proprietary CMS platform, managing a two-person QA team and multiple concurrent go-lives.
- Built a company-wide accessibility and Core Web Vitals dashboard with WCAG reporting, WAVE/Axe checks and historical KPI tracking, adopted by leadership as a quality metric.
- Engineered an AI-powered content migration pipeline using Python, Crawl4AI, Claude API and CMS integrations, reducing migration effort from weeks of manual work to hours.
- Developed internal QA tooling including BugHerd analytics reporting and automated injection of QA tooling into site templates.
- Drove AI adoption by delivering internal Claude Code and MCP workflow sessions and leading persona-based AI chatbot testing with Promptfoo.

CORE SKILLS

QA & Testing: Accessibility testing, WCAG 2.1/2.2, WAVE, Axe, Lighthouse, Core Web Vitals, manual QA, automated QA, regression testing, UAT, cross-browser testing, mobile testing, defect triage, BugHerd, Playwright, Promptfoo.

Front-End: React, JavaScript, HTML5, CSS3, SCSS, MVC templating, responsive design, CMS theme/template development, WordPress

Automation, Data & AI: Python, FastAPI, Crawl4AI, web scraping, crawling, sitemap generation, CMS integration pipelines, AI content refinement, Claude API, LLM integration, prompt engineering, MCP, n8n, Apify, MySQL, SQLite, pgvector.

Reporting, Cloud & Delivery: Internal dashboards, KPI reporting, historical trend tracking, data visualisation, Git, AWS, DigitalOcean, Dokploy, SEO/AEO, structured data, schema, Google Search Console, Figma, Agile/Scrum, team leadership.

PROFESSIONAL EXPERIENCE

Interactive Schools - QA Lead

March 2022 - Present | High Wycombe, UK

- Lead QA across 250+ school websites on the SprXcms platform, coordinating a two-person QA team, concurrent go-lives, regression testing, accessibility checks, defect triage and release sign-off.
- Designed and developed an accessibility and Core Web Vitals reporting platform with WCAG, WAVE/Axe and Lighthouse metrics plus historical KPI tracking across the full website estate.
- Built an AI-assisted content automation pipeline that scrapes site pages, generates sitemaps, refines content and publishes into the CMS, cutting content migration from weeks to hours.
- Created internal tools including a BugHerd analytics dashboard and automated QA-tool injection into site templates, improving visibility of defect patterns and testing coverage.
- Led QA for an AI chatbot using persona-based testing in Promptfoo, covering content quality, tone, edge cases and reliability across realistic user scenarios.
- Delivered internal Claude Code and MCP sessions with live workflow demos, helping engineering, QA and content teams adopt practical AI-assisted delivery methods.

Gritstone Technology - UI Developer

June 2021 - January 2022 | Kozhikode, India

- Migrated legacy AngularJS applications to Angular 10, building reusable, testable front-end components within an Agile Scrum team.
- Converted PSD and Adobe XD designs into responsive HTML, SCSS and JavaScript interfaces with strong cross-browser compatibility.
- Set up build and test scripts supporting CI/CD pipelines and more reliable front-end delivery.

Dream Souq Pvt Ltd - Front-End Developer

December 2019 - December 2020 | Kozhikode, India

- Built user-facing features and responsive interfaces using HTML, CSS, JavaScript, jQuery, Bootstrap and SCSS.
- Optimised websites for speed, browser compatibility and maintainability while collaborating with design and back-end teams.

G Data Technologies Pvt Ltd - Senior Web Developer

March 2018 - October 2019 | Kozhikode, India

- Developed the UI for a hospital management application, translating product requirements into responsive front-end screens.
- Managed cloud hosting, server migrations and email migrations across AWS, Google Cloud and DigitalOcean.
- Delivered e-commerce builds and CMS customisations across Magento, Shopify, WooCommerce and OpenCart.

DayScholars Innovations Pvt Ltd - Web Developer

January 2017 - March 2018 | Kozhikode, India

- Built responsive front-ends from design files, customised WordPress themes and managed CMS website updates.
- Improved site speed and produced HTML email templates for marketing campaigns.

Earlier Experience: Web Designer, Ipix Solutions (2016) | Support Engineer, Prizma Technologies (2015).

SELECTED PROJECTS

SprXintel

- Designed a school data-intelligence platform aggregating 38,000+ schools using python, and Next.js.
- Built the scraping and enrichment engine behind large-scale content extraction, semantic search and CMS migration workflows.

SprX EnrollIQ

- Created an admissions prospect-scoring module from concept through PRD, scoring logic and Figma information architecture.
- Built a React prototype and presented the module as an internal product pitch for improving admissions prioritisation.

BugSwarm

- Designed an autonomous bug classification and verification workflow using Claude API, Playwright and the BugHerd API.
- Mapped a human-in-the-loop QA process for reproducing issues, validating fixes and reducing manual triage effort.

EDUCATION

MSc Information Technology: Anglia Ruskin University, UK | January 2022 - May 2023.

Bachelor of Multimedia & Communication: University of Calicut, India | 2011 - 2014.
